

This kit was designed and made by NORTHEASTERN SCALE MODELS, Inc. Ballard Vale, Mass.

The Center Flow Car represents the most modern method of rail transport of dry, bulk materials. It is also of the latest type of welded steel construction, making the car body one single piece.

When assembling the car body, install the roof after the sides to insure tight joints along the sides.

The standard color for this car is light gray. Trucks are black.

Trucks and couplers are not included in this kit.

Either Friction Bearing Trucks (w/journal boxes) or Roller Bearing Trucks may be used.

In case a part is missing or defective, or if a part is spoiled during construction, send to NORTHEASTERN SCALE MODELS, Inc., Box 100, Ballard Vale, Mass. 01840 for replacement.

When corresponding regarding this kit, refer to "Center Flow Car".
