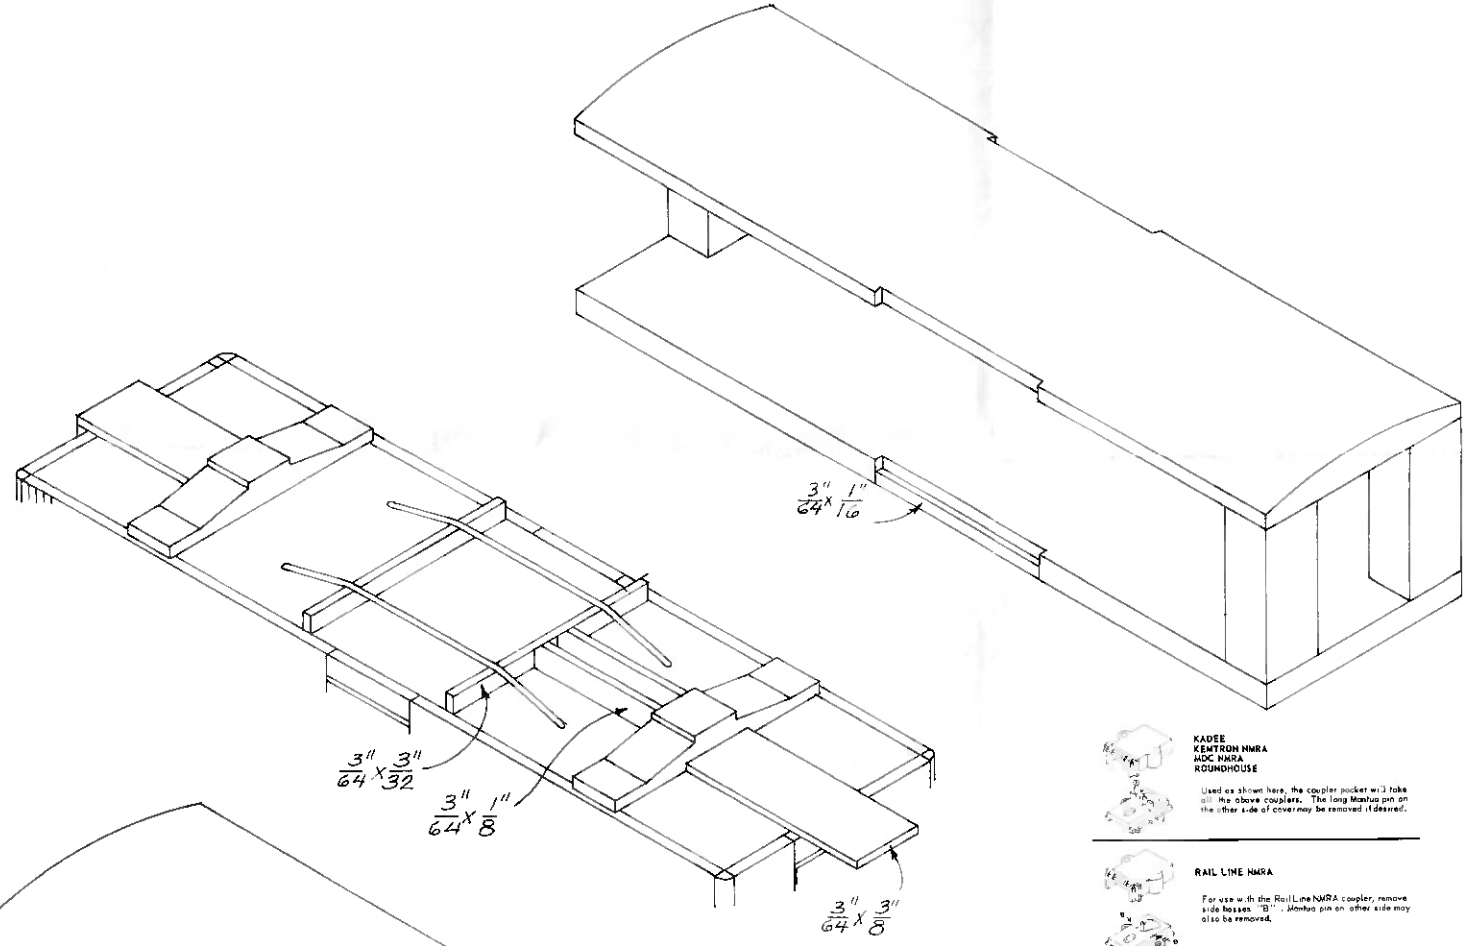
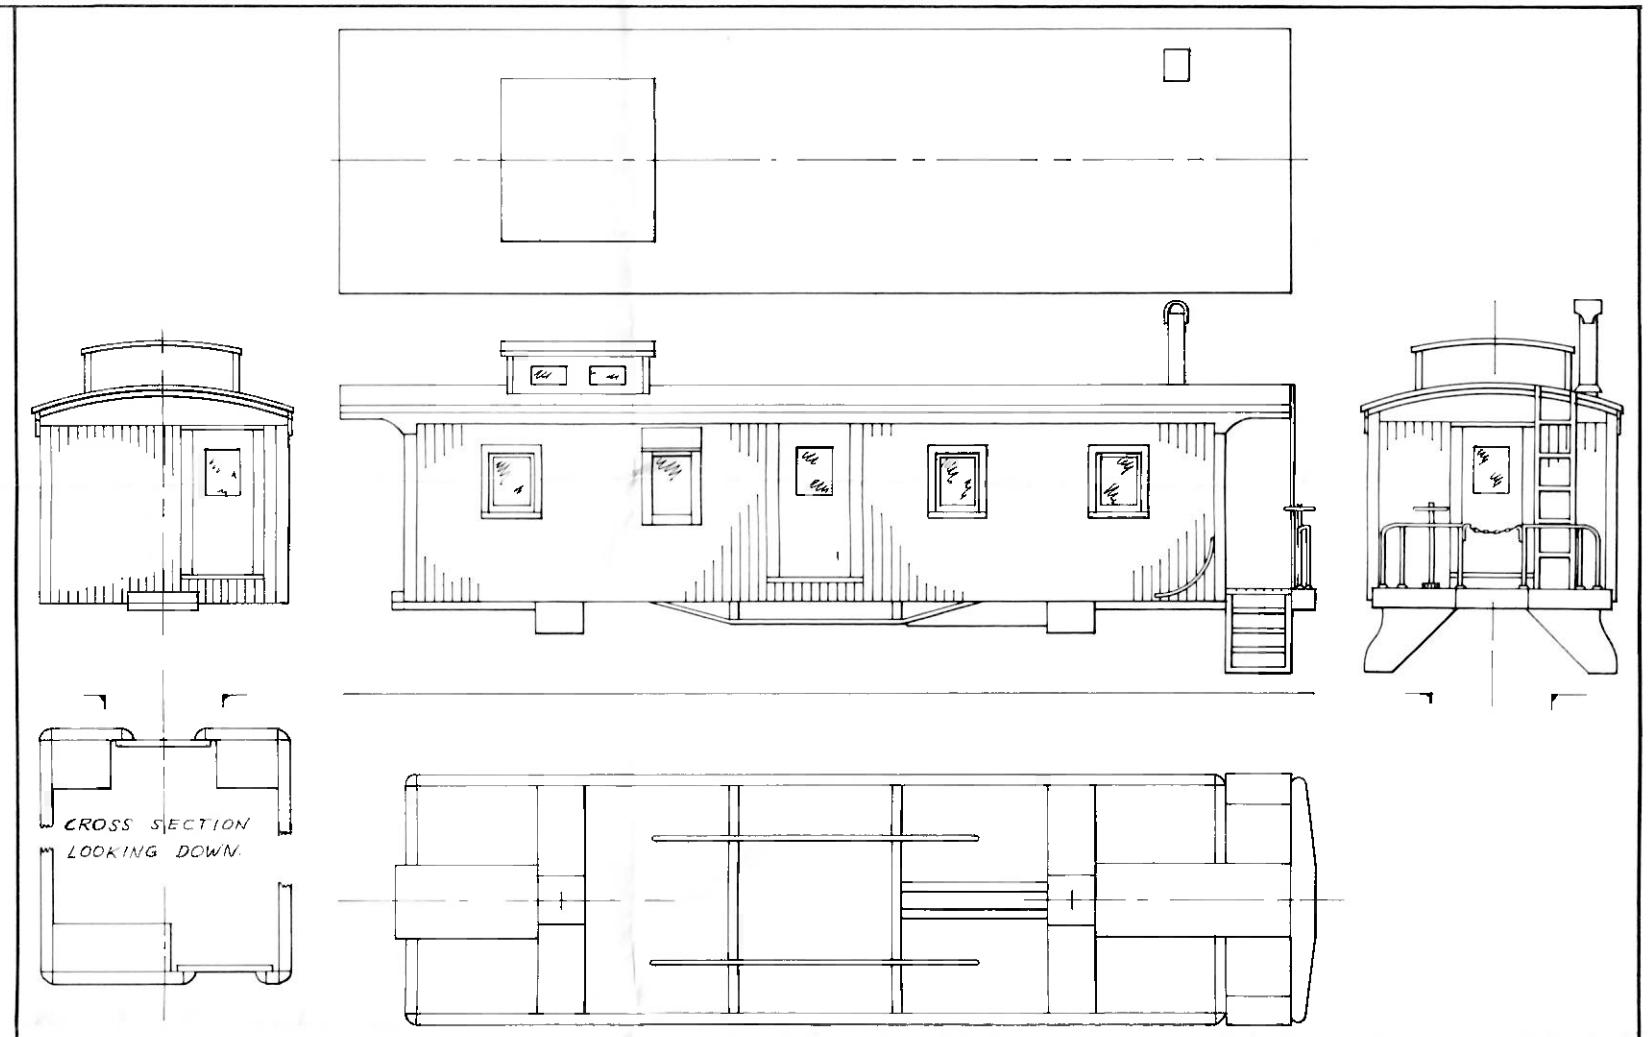
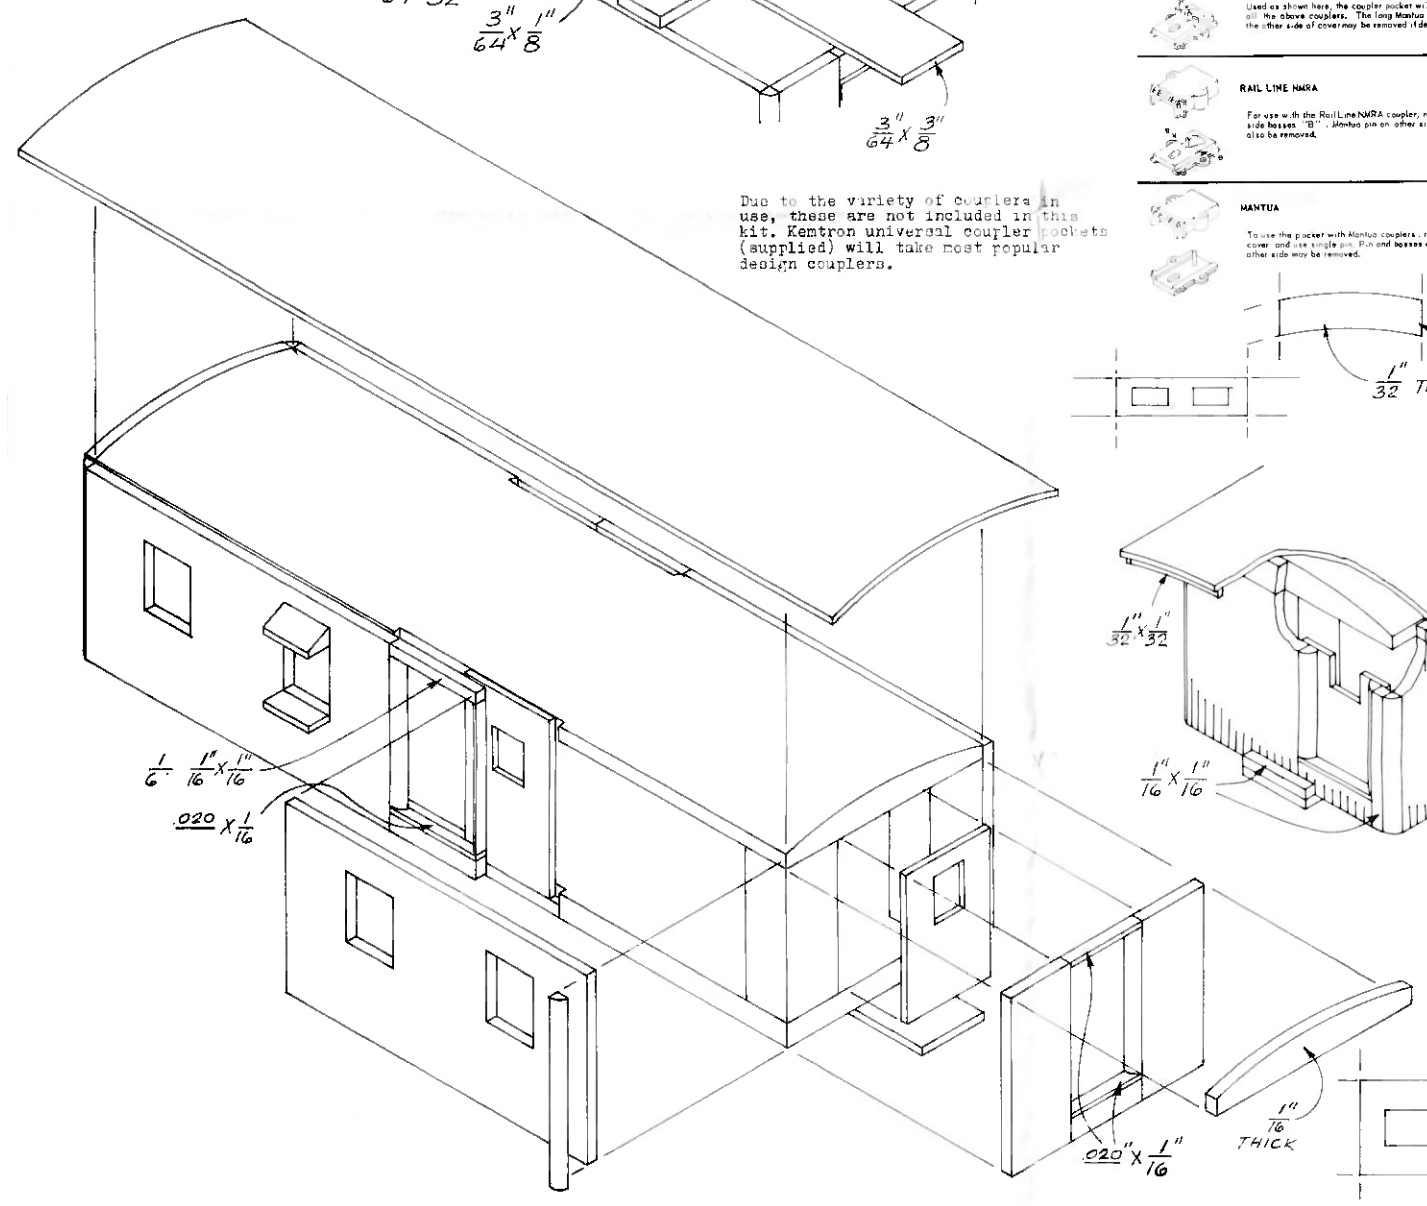
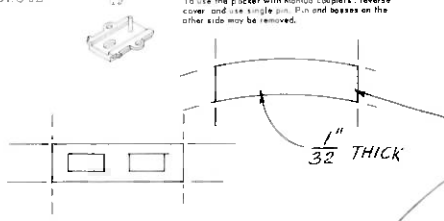
CB & Q
DYNAMOMETER CAR.

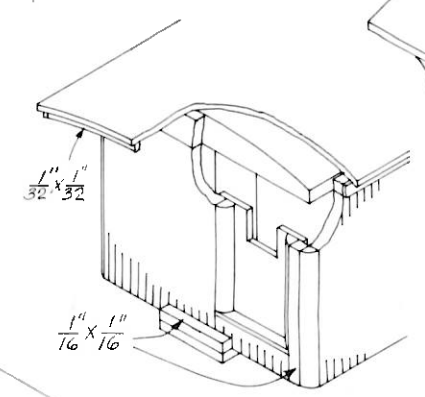


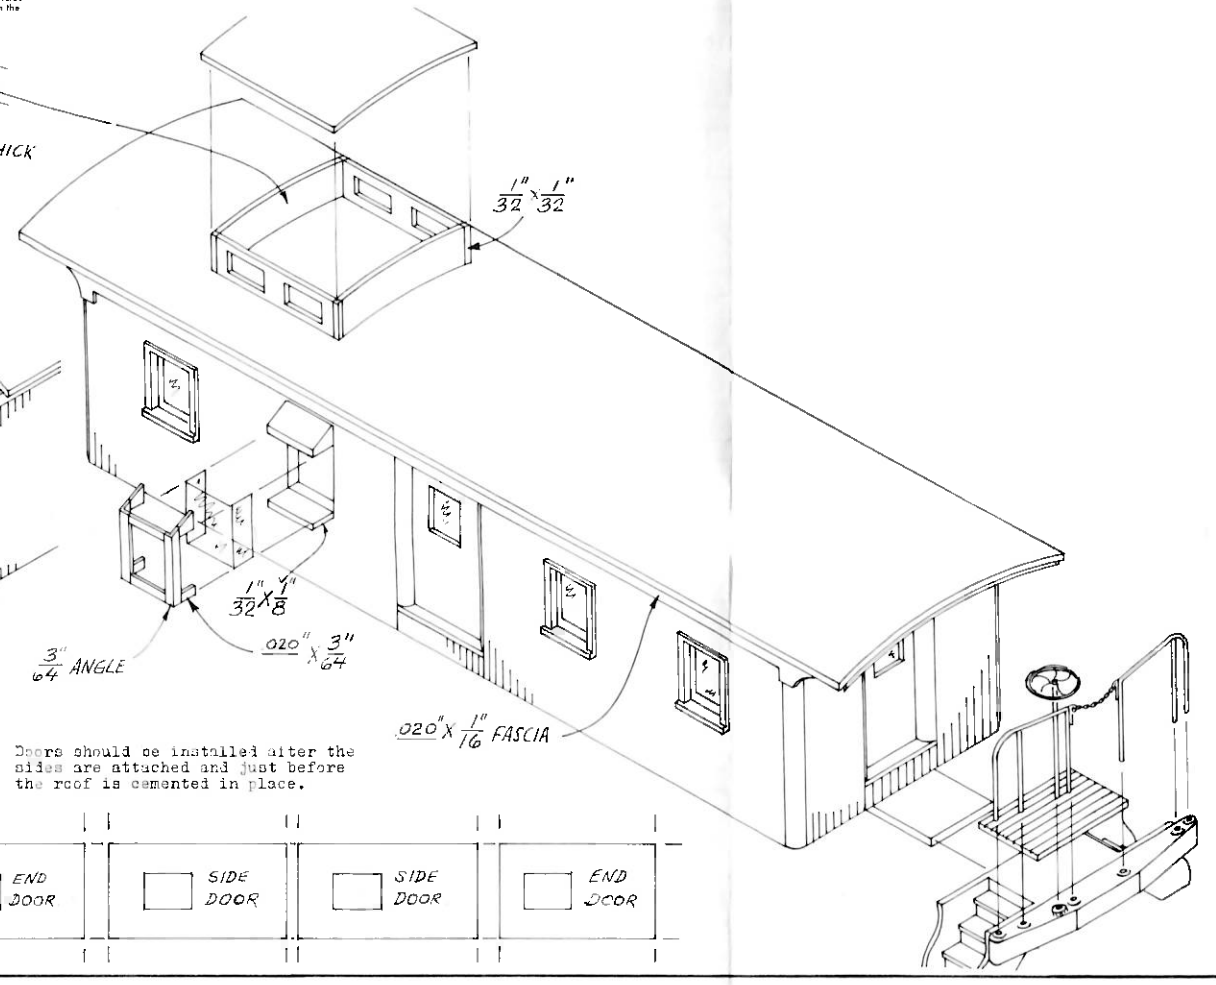


Due to the variety of couplers in use, these are not included in this kit. Kemtron universal coupler pockets (supplied) will take most popular design couplers.

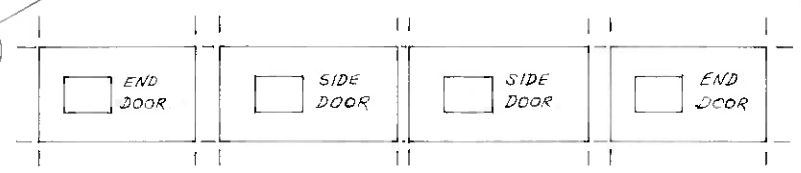








Doors should be installed after the sides are attached and just before the roof is cemented in place.



The dynamometer car is equipped with apparatus for measuring and recording drawbar pull, horsepower, brake pipe pressure and other data connected with locomotive performance and train haul conditions.

The correct trucks for this kit are old style short passenger trucks.

This kit was designed and made by NORTHEASTERN SCALE MODELS, INC. Box 425, Methuen, Mass. 01844

In case of shortage, damaged parts or if you spoil a part, send direct to NORTHEASTERN for free replacement.
